About Me

From a young age I have been fascinated by the power of computers and what can be done with them. As a result, this fascination has been largely responsible in my development into a competent technology enthusiast, as well as my assumption of a career in the industry.

At this time I am a Recent Graduate from Enspiral Dev Academy a highly intensive Web Development course / Internship on steroids. I'm currently seeking a development role to solidify my technological skills & knowledge in a practical, fast-paced environment.

Aside from my technological background, I'm highly personable with a positive disposition, seeking enjoyment from challenging projects. I'm also highly driven to reach my full potential, in every task, duty, and field I'm involved in.

Education

- 2016 ENSPIRAL DEV ACADEMY

Projects

BEEP BOOP BOT

BeepBoopBot is an educational game aimed at children to teach them the basics of programming and logic. The player is presented with a robot (B3), who must

navigate through a course filled with various obstacles in order to reach the exit.

Help B3 save the world!

REUSER ORG

Reuser is an open-source platform, built by developers to provide people with an easy way to give away items that they no longer want.

This is done to reduce the amount of waste that is sent to landfill every year and also to help people living in poverty.

CRYPTONITE

Cryptonite is an online encryption tool that allows users to easily encrypt and decrypt messages using a variety of encryption methods. They also have the option to select a hash type to allow recipients to validate messages after decryption.

Privacy is Everyones right
